

TeamTec Incinerators

Teamtec Containerised Incinerators

TeamTec is a leading manufacturer of marine and commercial land based incinerators, stripping ejectors and fire rated windows for Remote Sites, ships and offshore applications, with an export share of 80% to clients worldwide. Located on the South coast of Norway with a close connection to the sea and the shipping environment,

Teamtec presents the highest quality products in line with the best practice.

TeamTec incinerators are highly regarded within the industry for offering alternatives to the costly and difficult practice of disposing waste.

Do you need to dispose of one or more of the following?

- sludge (from heavy oil powered engines)
- waste oil
- lubricants
- solid waste like cardboard, plastics, paper, wood, rubber, cloth, oily rags
- food waste
- hospital waste (in remote sites)

Teamtec incinerators offer economy, practicality and simplicity when considering alternate means of dealing with waste

These high-tech incinerators are computerized to make daily use simple, fully automated and safe for the user throughout the extended life of the unit.

All Teamtec units operate at high temperatures to enable an increased capacity for burning both liquid and solid waste, all the while remaining compact and efficient.
